VALVES & CONTROLS

Morin Valves & Controls is your local partner for sales, service and support for several industry leading brands of Valves, Actuation and Controls Products. We offer a wide range of technical services to meet your needs that include valve sizing & selection, assembly and automation. Our full-service Actuation & Controls program is designed to handle your MRO, project and those 'problem' application requirements. We can provide full automation packages on our valve products, 3rd party valves and field retrofit for those valves already in service.
