

## Ball Valves

---

- Full & Reduced Port Floating Ball Valves
- Trunnion Ball Valves
- 1, 2 & 3 Piece Industrial Ball Valves
- Flanged, Threaded & Weld End Connections
- V-Ball & Segmented Ball Control Valves
- Critical / Severe Service Ball Valves
- Composite Body for severe corrosive media and hostile environments
- PTFE, TFM, & Ceramic Lined Ball Valves
- Elastomer, Polymer & Metal Seats
- Cavity Filled
- Multi-Port Ball Valves

## Butterfly Valves

---

- Resilient Seated – Elastomer Seats
- Double Offset High Performance – Teflon & Metal Seats, Fire-Safe
- Triple Offset – Zero Leakage
- Composite Body for severe corrosive media and hostile environments
- PTFE, TFM & Ceramic Lined Butterfly Valves
- Wafer, Lugged & Double Flanged Body
- ESD, High Pressure, High Temperature, Cryogenic, Corrosive & Erosive applications

## Check Valves

---

- Single Disc, Wafer Style
- Dual Disc, Wafer & Lugged Body
- Flanged Body Check Valves
- Silent Check Valves
- Check Valves for Slurry Applications
- Composite Body for severe corrosive media and hostile environments
- External Spring, Lever & Weight
- Foot Valves w/ Inlet Screens

## Knife Gate Valves

---

- Elastomer, Polymer & Metal Seated Knife Gate Valves
- Slurry Valves designed for abrasive services
- Penstocks & Sluice Gates
- Single Wedge & Fabricated Wedge Gates
- Custom Design Capabilities

## Plug Valves

---

- Rectangular & Round Ported Plug Valves
- TFM Lined for Severe Duty Service
- Rubber Lined, full compliance with AWWA C517 for use in municipal, power and industrial applications.

## Actuators

---

- Pneumatic, Hydraulic & Electric
- Quarter-Turn, Multi-Turn and Linear Cylinder
- Scotch Yoke and Rack & Pinion
- Integral Lock-Out
- Partial Stroke Testing
- Emergency Shut Down (ESD)
- Corrosion Resistant all Stainless Steel available

## Controls

---

- Position Monitors. Transmitters & Control Monitors
- Intelligent Positioners
- Wireless
- HART Compatibility
- Networking, Monitoring & Control of Process Valves

## Lined Piping & Valves

---

- Composite Piping System lined with Seamless PTFE
- PTFE Fitting Liners incorporate exclusive radial locking ribs to maintain stability
- PTFE Lined Carbon Steel Pipe
- FRP Piping Systems
- PFA Lined Ball, Butterfly, Plug & Diaphragm Valves
- PTFE Site Glass & Ball Checks

## Automatic Recirculation Valves

---

- Provide effective centrifugal pump protection from serious damage which can result from temperature rise or instability if operated below the required minimum flow
- Combine the multiple functions of main flow check valve, flow sensing, minimum flow control, pressure reduction, and pulsation dampening into a single valve body

## Gate, Globe & Check Valves

---

- Cast Carbon & Stainless Steel Valves
- High Pressure, Forged Chrome Valves
- Pressure Seal Valves – Specialty Steam applications
- High Pressure Vent, Drain, Blow-Off & Continuous Blow-Down Applications
- Bellows Sealed Globe Valves for Hazardous & Critical applications
- Extended Body Valves
- Flanged, Threaded & Weld End connections
- Straight & Y-Pattern Valves
